St. Germain REVEALS Everything Is Falling Apart…

Geoffrey Hoppe,
Alex Ferrari

St. Germain REVEALS Everything Is Falling Apart… But This Is What Happens Next-Geoffrey Hoppe

https://www.youtube.com/watch?v=2F_UKF3gBCk 65m Apr 2026

Is the world collapsing… or are we witnessing the greatest transformation in human history? In this powerful conversation, Geoffrey Hoppe channels a profound message about humanity's evolution, revealing why global chaos, rising tensions, and collapsing systems may actually be part of a massive shift in consciousness. From hidden corruption being exposed to the rapid rise of Artificial Intelligence, this episode uncovers what's really happening beneath the surface—and why it may all lead to a sudden and unexpected breakthrough. But this isn't just about the world—it's about you. This episode dives into inner transformation, self-awareness, and the hidden intelligence within every human being. If you've been feeling overwhelmed, uncertain, or like reality itself is shifting… this conversation will help you understand why—and how to navigate what comes next.

07:35 – Rising Consciousness

10:10 – Sudden Breakthrough
11:47 – Past Lives Shift
18:47 – Humanity Evolution
21:00 – AI Intelligence
24:57 – Systems Crumbling
28:17 – Guru Collapse
33:36 – Inner Power
36:10 – Divine Union
41:39 – Truth Revealed
46:00 – AI War
54:15 – Future Breakthrough

ALEX: We are seeing hidden networks of power and corruption being revealed in society. Is humanity entering a time where secrets can no longer remain hidden?
GEOFF: There will be a euchatastrophe, meaning a sudden turn of joyful events on the planet. In order for the biology to advance to the next level, there has to be the consciousness to go along with it. These are going to be shifts into harmony, into abundance, into a lot more true consciousness. And that's what I'm excited about. This is the deepest levels of acceptance of self, as a human, as a divine being, as the I AM.
ALEX: With these tensions rising around the world and the possibilities of larger wars, what role does these conflict-playing humanities evolution?
GEOFF: The real war that most people aren't familiar with or aware of is not the missiles and not one country against the next real war that's going on right now, the scarier war has to do.
ALEX: I like to welcome back to the show returning chamfering, Geoff Hoppe. How you doing, Geff? I'm doing great. How are you doing, Alex? Good to see you again, my friend. It's been a little bit since you've been on the show. And I know there's a few things have changed in the world since Sluts are you spoke? Yes, a couple. So for people who haven't seen, we have, I don't even know how many interviews we've done. I think we've done at least three, if not, three or four.

Yes, three or four, we've done over the years. So people can go back and kind of get a deep dive into your past and your history, and all that stuff. But for anyone who doesn't know who you are, what you do, can you give us a quick 30 second explanation of who Adamus is and what you do as a channel and so on?

GEOFF: If I knew I'd die, yes. I channel Adamus Saint Germain with the Crimson Circle. Adamus is a facet of the beloved Saint Germain. And it's like he molded this persona just for Crimson Circle, for our group, because his message is different than it was as Saint Germain, which he's been around for a long time with that.

So, gosh, I've been doing that. And prior to channeling Adamus, I channeled Tobias, been doing it for 25 years. I came out of the corporate world. I lived in Dallas for quite a while, was involved in marketing and then telecommunications, aviation.

And this happened all by surprise. I mean, I didn't have a spiritual background. None of that. And just one day, Tobias came and started talking to me and it never stopped. So, we enjoy the hell out of it. It's never a dull moment. That's for sure. And the biggest thing is we got a great team that's supporting all this. We've got an amazing team worldwide. So, yes, it's awesome. But people keep saying, well, when are you going to retire? And it's like, have no desire to do. Yes, I like it. What would I do? I'd still be channeling.

ALEX: I mean, you live in Hawaii, for God's sakes, what are you going to do? Retire? Hey, Hawaii, anyway, you're already there.

GEOFF: So, yes, move to the kips here, New Jersey or something. I, I really enjoyed it. And particularly with Adamus right now, he's on Fast Track, because there's so much happening in the world, so much going on. And he's staying on top of it. He's pushing us hard. I mean, these are not necessarily the feel good kind of channels. They're not meant to coddle or anything. He's pushing the limits of consciousness, of energy.

We're getting very involved with AI, not as any sort of sacred being or that. But it's an incredible tool right now for understanding consciousness and energy. And we'll at some point transcend that. But that's been a big part of our focus right now. And which is very interesting. It's fascinating. I'm not a technical person by nature, but I

just, I love what AI can do. And we're incorporating it not just into the work we do into consciousness, but also into our everyday work into videos, music, our workflow processes and everything. It's truly quite fascinating.

ALEX: That's pretty awesome, man. Pretty awesome. So, so after all these years, you've been doing channeling, Saint Germain, how is the energy of the messages compared to what it was like five years ago versus today?

GEOFF: I would say it's much more intense. It's, I could tell the focus when he's channeling, like it would just got done doing a couple of days of filming the last few days. And it is so intense, not intense as in the delivery, it's not emphatic, but the intensity and the energy. I would say that the biggest thing I've noticed over the past five years is it's not just a dumbus delivering the message through me, but he, he gathers up all of Crimson Circle, all of Shambhara. He gathers up me, he gathers up any listener who will ever listen to it and puts that into the message is called a shout, meaning it's a collective. What I've noticed particularly in the last year was that he's, it's certainly he's stepping back, but he's allowing in, in almost demanding more of the energy from the listeners going into the message.

So literally they'll hear their own voice in it. And that's been a big change and a very welcome change because then it's not just me channeling some ascended master, it's, it's all of us. So the message is very, very reflective of, of the group at the time and anybody who will listen to it.

And it makes it more intense. It makes it more personal and real. It's not like a ascended master standing on his throne or his podium and delivering a message for everybody to be hold. It's all of us.

And we're hearing ourselves through the articulated message of Saint Germain, but we're hearing ourselves. And the other part is that it's gotten very down to the core, meaning, all right, we don't have time, we don't have the luxury now to go back and cuddle ourselves. He's made it very clear, if you got problems in your life, it's because you're still getting something out of them, you're deriving something, you're not a victim.

And it's serving you. And when you're ready to move beyond, you do. But we're not going to sit around and do a lot of healing. We're not going to do any counseling, none of that. We have to move on. Talking to our group, we have to move on. And it's we get caught up in the whole thing with poor me and I had all these problems in my life and everything.
And he's like, there's not where we're going, there is not room for that. And if you try to, it's really going to hurt. You try to bring old wounds that you're not really ready to release into this new energy. And it's really going to hurt.
So I would say those are the biggest changes in the last couple of years.
ALEX: Now, when you personally look at the state of the world today, what feels most different energetically from the previous cycles of crisis that humanity is?
GEOFF: That to me is very, very clear. Its consciousness is different now. You know, I've been around on the planet for a little, little while lived through the sixties, both meaning the 1960s and my own sixties.
So twice. And what I see that's different than like the era, like the late sixties or into the eighties you go through the whole list of things, but late 1990s, the difference now that I see that's actually incredible is there's more consciousness than ever. And there's more people on the planet right now that are letting their light come out. And not necessarily taking to the streets, as a matter of fact, quite the opposite.
They're bringing their light to the planet in a very subtle way. They're not trying to inflict it. They're not trying to demand change. And when conscious beings come to the planet and do that, let their light radiate just sitting on a park bench you don't have to go out and write a book or do anything unless you want.
But when that light is there, then other humans can then see more potentials instead of just seeing a handful of potentials on how do we get past this issue? Suddenly that light from conscious beings opens up for other humans. There are higher potentials. There are truly what we call sea changes that can take place that in spite of all the

global conflict right now, I'm actually more hopeful than ever what's going to happen with this planet. What we're seeing is kind of a shakeout in systems and kind of an evolution of the of humanity at its core.
And that's not always easy. It brings up conflict and finger pointing and everything else. But what I what I absolutely see is this light from people and what you're doing on your show, Alex. I mean, that's light going out to the world. Your guests that come in. And they're radiating their light, their consciousness, which is huge.
And it has an incredible effect on the energy, not physical, fuel energy, but on the energy of the planet. So in spite of what we're going through right now, I've never been so hopeful and so optimistic for where we're going.
ALEX: And as a person who facilitates these messages, what has surprised you about what Saint Germain is saying right now? Have you been just like, Oh, okay.
GEOFF: On a daily basis, it's like, well, yes and Adamas, as you know, is provocative. He likes even getting people a little irritated at points because it gets them thinking. I think his biggest message and like him actually to explain more about this is what he calls the euchatastrophe that is he's certain is coming to this planet. The euchatastrophe is it's a sudden turn of events in a very joyful way. You can think we're going down this terrible path. We have environmental issues. We have wars that are taking place, financial issues.
And it's very easy to get caught in that and say boy, this sucks. I mean, where's his planet going? He is wholeheartedly convinced that there is there will be a euchatastrophe, meaning a sudden turn of joyful events on the planet. Sometimes it's hard for me to see that when you go to Costco or Walmart, it's like really? But he explains the physics and the metaphysics of it and says that that is what comes next to the planet. And it's surprising in a way and is very hopeful in a way.
So I think that's the biggest shocker because my human self says, now we got a lot of work to do and we got a long way to go. And will we make it? And is AI going to take over the world? Or little robots

going to be running around and telling us what to do? But he's like, no, that's not what's happening right now on the planet. It's this very light that I was talking about is the thing that's going to create the euchatastrophe.
So that's the biggest shocker. And then the other one is, as I mentioned, he's like, just get over it. You know, you're here to do work and stop constantly processing old wounds and problems. And even from past lives. He says that our past lives right now are changing their stories. In other words, they're not locked in history that a past life literally can rewrite their story, relive their story. It's actually taking place right now because there truly is no time or space.
But the past lives are actually now clearing themselves and literally rewriting their stories. And when I ask about it, I say, you mean, like just a different perspective of what they did. And he said, that and oftentimes the whole past life changes. And he said, so now watch what happens. We're here in the now.
Past lives are changing their stories. We're changing our stories also. The past lives are changing theirs. When the past changes like that, can you imagine the impact in the future? It's kind of mind boggling. And but he said part of the issue we're facing right now is that all meaning those who are conscious is that you can feel those past lives changing.
And it's not always easy for them. They have to do a lot of releasing. They have to do a lot of letting go of stories, which basically then lets us let go of that. But if you can imagine a past life redoing their whole story, the effect that it has on us you as an individual, but also the planet in general, it's absolutely the physics and metaphysics are amazing.
ALEX: Geoff, I have to ask you, do you ever feel the weight of delivering these messages in such a different times? No, no, no, just rolls off the back, right, like a duck?
GEOFF: Yes, it's every day. I actually really, really appreciate you asking that because we stay very busy. We've got a lot on our plates and doing a lot of things. And yes, there's times when I'm like, just like, I just need some kind of myself. And it's difficult for me to do that

my own fault, because I want to jump back into doing something. But from another standpoint, I have to realize that, first of all, I can't take that approach, because then you get all caught up in it.
And secondly, I look to the fact that I love doing this work. I mean, absolutely love it. But it's my passion day and night. So it's really not a burden. I just need to learn to take more time off.
ALEX: You and me both, brother. You and me both. I know.
GEOFF: When's the last time you had a vacation, Alex?
ALEX: The summer, we had it over the summer. It was a very beautiful, beautiful vacation. If it wasn't for my family, I'm not sure if I would have gone on a vacation. That's just the nature of who I am. I'm always like, but I'm learning as we get a little older, and things start to hurt a little bit differently and the noises start happening. And you understand that you're not 20 anymore. And you can't go at that pace anymore.
You got to, it's kind of like when you're when you're younger, it's all about the physical and you just try, especially men, it's all about, boom, boom, boom. Powering through. But as you get older, you don't have the same power or endurance or energy. So you have to start being smarter about your time, how you get that. So anytime I see an older guy go into a boxing ring against a young guy, I'm like, Oh, that hurts. That's got to hurt. Oh, get ready.
There was that one video. There was that one video was a guy in his 70s, but he was a professional boxer, but he was a professional boxer when he was a young man. And there was this young guy with a hair bun and everything.
And he's like laughing and all this stuff. And the guy was like in a sweater and pants. And he went into fight the old guy went into fight. And my God, the within four punches, the young guy was like, what is happening?
And then afterwards, he the old man just went, boom, boom. But it just it was magical to watch. It was magical to watch. And the guy's like, please, please, please, and he felt everybody in the whole gym just silent. Yes. So that's an example of what we're talking. Yes, he wouldn't he couldn't have lasted 10 rounds, but he didn't need to.

GEOFF: He didn't need to. That's the important part. It really is. And I used to play a lot of racquetball. And the older guys were the tougher guys. They weren't running back and forth around the court like me. They would hold a position. They would know when to let a ball go. But I was exhausted by the end of the second match.
And they were beating my butt and it was so humiliating because I'm a young guy yet at the time. But yes, same thing. And I think there's a wonderful lesson for all of us to learn from it. It's not just the hard work. It's not just the powering through. It's working a lot wiser in what we do
ALEX: .And speaking of why sure, let's bring in Adamus and see what he has to say about everything that's going on in the world.
GEOFF: Great. I just need about 30 seconds and we'll bring him in and fire away.
All right, my friend. I AM that I AM Adamus of sovereign domain.

So, dear Alex, thank you for having Cauldre Geoffrey back on your show and me as well. It's always a delight and it's been interesting to watch your progress since the last time I was here, the evolution of your own programs, the evolution of yourself as much.
And you mentioned wisdom. And it's one thing in particular, I see that you've been gaining in so many ways. And certainly it helps to be constantly interviewing guests, guests that bring great information and wisdom and consciousness to the planet.
So, you're kind of right in the middle of the freeway. When it comes to that, you have the absolute benefit of being in their presence, being in their light. And that helps you open up your own. I see that you don't draw off of them like to take their energies, their thoughts, but it triggers things within you.
So, I know too, at many levels, it's been a bit challenging, but you just take a deep breath and allow might get you through. So, thank you for having me back.

[START CHANNELING]
ALEX: Thank you so much for those words. I appreciate you. So, Adamus, from your perspective, what is humanity actually going

through right now?
GEOFF: Well, let's look at the 30,000 foot view. They're going through a total change would be the best way to describe it, literally going from the old version of humanity into the new species of human. The new species doesn't necessarily just mean the biological evolution. It's everything. It's the mind. It's the way that Angelic beings who have taken on the human process. It's the way they infuse their energies right now.
So, what you're seeing is really the death of the old version of the human, the *homo sapien*, and the evolution of the new. It's happening right before your very eyes. And it frightens some people. It tremendously frightens them, but it's all overdue. The biological systems that you have right now essentially go back to the times of Atlantis.
So, a long time since biology has really evolved. If you look at the evolution of consciousness on a planet, it's going like that, almost like a hockey stick. The evolution of the biology itself is not. It's still relatively flat line. And right now there's an energetic demand to move into the next evolution of biology.
And it might not all be biology. It could be what we call augmented. It could be, some people say artificial, but it's all artificial to begin with, including your biology, but it could be supplemented by implants of various kinds. I'm not talking about the mind implants.
So, for those readers who are going to send in a text, that's a different thing. But the biology is evolving very, very rapidly, to some degree, almost at a scary level because in order for the biology to advance to the next level, there has to be the consciousness to go along with it. In other words, if technology today enables the human to be birthed not through the regular process, through the womb, but through a technical process, laboratory process. There's not necessarily anything wrong with that. It's just very different.
But without the consciousness or the light in place, then it could go wrong. And we could end up again with a scenario like happened in Atlantis. I don't see that happening. But that's one of the huge changes that's taking place here on the planet. It's the evolution of the human into a whole new species. The mind also is changing.

And what you have right now on the planet is new forms of intelligence, or at least the awareness of intelligences.
And that's not just AI. AI is an intelligence in itself. And it's very, very fast. It's going to be coming to the point. I'm going to call it early 2027, where what's called AGI is here, artificial general intelligence. It has the same capabilities as a human for the most part, not totally, but certainly AI is much faster, better at processing and organizing than the humans. But it doesn't have the emotional capability as a human. But it can emulate that. It can make it appear that it has. It's still rather clunky right now, but it's happening very, very quickly.
So there's an evolution of intelligence. And that in itself will wake up the natural, the humanities awareness of natural intelligence in everything. You've got your human intelligence, the mental, but it's very, it's very, very ancient. It's overly redundant with some 80 billion neurons in the brain. It's overly redundant. It's like on your computer having a backup system, but then about 1000 or more other backup systems to the backup. That's what the brain does.
But we're going to see that change. We're going to see people becoming more aware of the intelligence of nature, for instance, nature has an intelligence. It's not mental. It's simply an awareness of itself and its processes and how it ties into other intelligences. Everything has intelligence. The air you're breathing right now has an intelligence in it. The chair you're sitting in actually has an intelligence.
What we're going to be seeing on this planet as we transcend the mental form of intelligence is the, at least for conscious beings, is the awareness of how all these intelligences actually all work together on a regular basis and how energy itself sparks that, sparks that intelligence, and then how the intelligence works in patterning energies.
The bottom line that results in is with more awareness of intelligence. It allows a new reality to take place, a reality that would be difficult to envision right now because you're in a 3D, you've seen nature, you see cars, traffic, other people, because it's so bound by really a single form of intelligence right now, the human mind. That's changing rapidly.

Therefore, the ability to perceive other realities, and I'm not talking just outer space kind of realities, but things that are already happening right here, realms that are already here, the ability to perceive those is going to greatly expand, therefore changing the very basis of an understanding of human life on the planet.
That's all evolving at subtle but very impactful levels. That's why, as Colodra mentioned before, you're going to see some big shifts on the planet, big shifts, and not fearful shifts. These are going to be shifts into harmony, into abundance, into a lot more true consciousness. That's what I'm excited about.
ALEX: Why does it feel though that so many of these structures of authority are all failing at once? Everything seems to, it's not one industry, it's not one organization, it seems like all of them are cracking, all of them are falling, all of them, things, power structures are changing so rapidly and all at once. Like that movie everywhere, everything all at once. That's exactly how we feel right now.
GEOFF: Yes, and it has to, because again, the natural intelligence is built into everything. A financial system has an intelligence, and yet not mental, but it has the awareness that the energies are pattern in certain ways.
So as all the intelligence is linked together right now, you find systems, it seems that they're falling apart or crumbling, but actually they're evolving. They're shedding their old patterns, energy patterns things, codes things.
And what you're seeing is that coding kind of open up now, and the energies and the intelligence is actually naturally rearranging. It appears on the outside that a system is falling apart, but what's really evolving is the birthing of new systems on the planet.
The new systems are based on not some cosmic hierarchy that's dictating it, but humans with consciousness who know that the time for power on this planet is come to an end, absolutely come to an end, and will no longer be tolerated.
The social and economic injustices and imbalances, it will no longer be tolerated. The lack of abundance for many people no longer appropriate on this planet. That's literally what's happening, and it appears to be chaos as you go into it.

You read the papers or you go to social media or whatever. It's everything's falling apart. I actually encourage each and every one of you who is carrying the light, who has carried it for a long time now, to let that light come out, let it be known to the planet through the subtleness of your light that it's not falling apart. It's actually evolving in a most beautiful way.

Stand back, stand to what Tobias used to say, stand behind the short wall and observe rather than jumping into the fray, rather than just being another voice of duality. Stand behind the short wall and let your light shine because that has the most impact to render anything.

ALEX: With a lot of these systems and things that are starting to come to light, specifically things like the aisles and those kinds of things that have been very eye-opening, to say the least, and troubling, and sad, and all the emotions. In that net has also been included spiritual teachers. Spiritual leaders are being exposed and are starting to lose credibility. These are giants in the spiritual space. What is your take on why it happens to, I mean, I get it to politicians and to actors and to other people, but spiritual leaders seem to be being held to a higher standard, but they're still human. So what is the reasoning why they're falling? First question, second question is, is this part of a larger clearing of the space that we all need?

GEOFF: Let's start with religious leaders first. The exposure has been around for a little while now, at least a good decade or so. There were a lot of them who were simply power-hungry that they used the banner of religion to seek power, to feed off of other people. It affected it, it pumped up their egos. They thought there were grand teachers.

There are really no grand teachers on the planet, nor should anyone ever claim they're a teacher. A facilitator maybe, but a guide, yes. But to say, look at me, and that time has come to an end on the planet. There was one thing with the religious and the spiritual teachers, the ego factor, but two other factors that had a direct impact that you could almost trace the commonality with many spiritual teachers.

Two things, one was sex. It was a great feeding ground for sexual exploitation. You look back on some of the larger groups in the past, in particular, that had been exposed, and there was tremendous amount of sexual exploitation from the top down. It was like the religious version of the infiles.
The other one was money, an abundance, which essentially is power. You find these people, some of them getting very, very wealthy, and demanding money from their followers, almost extorting it, or at least hypnotizing them with the money, money that was in excess. When you have 93 Rolls Royces, that's a little bit much and private jets, not to mention any names, but no, that's excessive. There's nothing wrong with being abundant. Everyone on this planet should be abundant, but from your own energy, not taking it from others. Because the whole financial and even the balance of masculine and feminine on the planet is changing, it's affecting those very people who got caught in that trap. It was really power, sex, and money. It's not the place for it. You don't need it.
People could eventually see through it that this isn't a grand spiritual teacher. This is somebody with a lot of charisma that was able to get up there and have hypnotized people, and then take advantage. The sad thing, Alex, is with these teachers crash and burn. You've seen it. They crash and burn, and it's a very sad thing because they're still enamored with themselves. They're picked by the Lord or by... When they crash and burn, they realize that they're not. It's a very difficult thing for them to go through.
It's very humbling, but it tears them apart at the core because most of them actually got into the teaching because they did have insights and they had talent. Something sparked within them to share, but it got perverted and distorted along the way. Mind you, not all are like that.
You have a very good perspective in the work that you do. You see them on a regular basis, but yes, some get very distracted, and then the empire comes tumbling down.
It's also in a way good for people right now because they've got to stop and say, none of what you're seeking, none of what you're truly dreaming and desiring about, comes from another person.

Everything is within. I think Yeshua, Jesus said that. It all is within, and people need to learn right now that go within for your answers. It's not through me, definitely, and Kaldr is shaking his head like it's not through him either. We're simply there as agitators, or provocateurs, or ones who perhaps put out the information, but it's coming to the point now where people need to realize you have the answers.
They're right there. They're so close and take a deep breath and allow that to come forth. You don't need a spiritual teacher. The era of Guru is just over on this planet because it's all within you.
Now, maybe I, maybe you can help them realize it's all within, but that's the bottom line. That's a critical point, a point of separation right now. Yes, and that's something that we take very seriously at next level soul is that it's about finding the power within yourself.
ALEX: So my question, then, is how can people trust their own inner knowing when these external teachers are failing them if they've put, they've given their power away to a teacher or to a guru or something like that.
And again, I like what you said, not all gurus, not all teachers are bad. And they do facilitate and they do help you and guide you, hopefully, to find the power within yourself. How can, it's easy to say, oh, the power is within you. Oh, the knowledge is within you. How can they actually start to tap into that?
GEOFF: Good. Great question. Get the hell out of your way. No, it's an important thing because in the human mind, it likes to manage everything. It likes to control energy. It likes to direct where the entire being is going. And we're coming to a point now where the human part of you is here to experience a reality, to experience the creations of co-creations of your soul and yourself. And that's the important part.
The human still wants to control and manipulate energy. When you step aside, you allow the soul self or what we call the master self to come through. It's still you. It's not a separate entity, but it's a facet of yourself that you haven't really been aware of. You allow that to come through, therein lies all the answers.
And not the answers to what job should I take or is my relationship

with my partner, correct? Those are basically human answers. And actually, they don't become questions anymore as you allow your full self to come through. And some people would call it the light body or the free mind, the free intelligence. It's just the evolved self that's been waiting, waiting until the human stops playing the games, gets out of the way, then it will come through.

It'll integrate with the human because the human obviously has so much to offer. And there'll be the realization, this was me all the way along, but I just had turned my back to it. It's not an outside being. It's not a lord. It's not an alien being.

It's yourself that has been absolutely waiting. I'd go so far as some people would say, it's yourself from the future that is realized, that has wisdom, that is very balanced, that no longer fights energy, but allows their own energy.

This comes through, but not when you're trying to figure things out, not when you're trying to do like a flowchart of hierarchy of the spiritual beings. It's already there and it so wants to come out right now. You have to take a deep breath and stop trying to control yourself and more importantly, stop trying to control other people.

ALEX: Now you mentioned a little bit earlier about the divine feminine energy and male energy is shifting. What does that mean exactly?

GEOFF: The masculine-feminine energies have been a huge part of duality on this planet and in a way of having a greater understanding of the I AM, of your isness. It was a wonderful reflection. These are basically at the core of the ISIS and the Adam energies that have been present on the planet since humans were ever here. It's been a fundamental part of the structure.

That's changing now because first of all, you start to realize you are both masculine and feminine. It doesn't matter what body type you have, but those energies are there. The important role of the masculine-feminine energies, particularly in let's say the last 5,000 years and going beyond just procreation, the important role of masculine-feminine was to learn about *Love*.

Love was not something that was out there in the other realms from the beginning. Love was not something that spirit God never knew

about. Love was not on the other planets. It was first experienced here on planet Earth about 5,000 years ago.
Some people are going to take great exception to that and you're going to see all sorts of postings in the chat room about it. If you feel into it, it's very true.
Prior to about 5,000 years ago, there was familiarity, friendship, compassion, those type of things, but I'm talking true love, the type of love that takes your breath away, the type of love where it's life changing. It's all you can think about. It's a different type of sentient experience than just like friendship. It just affects the whole body and mind, but more in particularly the spirit.
So the masculine-feminine duality was a great way to experience love because you could also experience sex. It brought an understanding to the planet about love that then Yeshua, Jesus, picked up on about 2,000 years ago. Love was not really talked about prior to Yeshua. I mean, it was alluded to a little bit, but he was the master of love and he brought that. He consolidated that message about love.
So what's happening right now in the current era is that the need for the masculine-feminine duality, the mirror, is going away. The need to have a partner, to reflect self, to understand love is now transcending and what happens right now, the masculine and feminine within are basically merging.
There's no longer the defined lines in the energetics of masculine and feminine. All is a way for those who are ready to experience self love. And I'm not talking about self infatuation or like I love myself, but it's a thousand times more impactful and deeper than human love. It is scary. It is very scary in a way, but it's the most beautiful thing that one will ever do on this planet, ever do.
And that's that we're in that time right now. I call it master love or love 2.0. And it's not the it's not the fluffy, syrupy kind of human Valentine love. This is the deepest levels of acceptance of self as a human, as a divine being, as the I AM, that's what's happening.
And that's why it's necessary for the old separation of masculine-feminine within yourself to take place, because you're merging together now on your way to a sentience that I can't even describe

Alex, because it's so different. Words would fall short, but it's ultimately self love.
And that's what's happening on the planet, quietly, slowly, one by one. You won't read any books about it, because anybody who tries to write a book about defining how to get to self love and what it's like, it's phony, because you can't really describe it.
You can feel it, you can experience it. It will send you into the most expanded and most beautiful of realms, because you're finally discovering yourself. But that's what's happening quietly on this planet.
That's why I'm so optimistic and hopeful of the future, because I see it happening, a few here, a few there, or at least moving closer and closer to that point of self love. And it requires getting rid of a lot of the old facades, a lot of the old BS, and particularly spiritual macho, spiritual bullshit. And it requires letting all that go. And it's not always easy, because that's the identity, but it's changing right now as we enter truly into a phase of self-love.
ALEX: Now, we mentioned it a little bit earlier, but we are seeing hidden networks of power and corruption being revealed in society. Is humanity entering a time where secrets can no longer remain hidden?
GEOFF: Absolutely. From a very practical standpoint, it's called your internet, social media, AI, they just can't be. It's out there in an instant. And but energetically also, humans have come to the point of saying no more. They're not going to tolerate it.
I truly believe that humanity, that the vast, vast majority of humans have goodness in their heart. They do dumb things. I did in my lifetimes, we do dumb things, but there is such goodness in the human heart that is actually now opening up wasn't safe to do this until now.
And that goodness, even if the person does dumb things, stupid things, maybe even unintentionally hurts another, but there's goodness in their heart in well over 97% of the humans on the planet. There's some who do not, but they're a small minority. That is opening up right now. It's coming to the surface.

And it's not a spiritual phenomenon. It's simply the goodness of humanity. That's coming to the surface and that is also one of the other factors that's changing everything on the planet. Even in this time of disruption and chaos, I ask all of your listeners and viewers to feel into that goodness that's in the heart of people.

ALEX: With all this stuff that's happening, why does the truth often surface through chaos rather than through peaceful change? Why do we have to go through this?

GEOFF: Adapt. It's more dramatic and drama brings more tension. Drama is more impactful. And the drama awakens that deeper subtle knowingness inside ultimately. It kind of shakes it up. But yes, I wondered that all the time.

Why all the drama? But humans use that drama right now. Drama makes you feel alive. You have somebody who's kind of bored with life. What do they do? They go out and create drama because there's an energy to it. It makes it reminds you, I am alive.

A person who was bored to death. They don't feel alive. They feel in an odd way, even depression is a form of drama. One would generally say that, well, depression, no, you're sad and you don't want to do anything.

It's drama just played out differently. Those things make you more aware of your awareness in a very odd way. Hopefully we'll overcome that humanity will overcome that. But now they use the drama to spike energy to then ultimately get them into the deeper levels of their being.

ALEX: Now, you were mentioning earlier too that we are there are wars going on around the world. There's been some that's been going on for a few years now, but there's been a recent one with what's going on in Iran. What with these tensions rising around the world and the possibilities of larger wars? What role does these conflict play in humanities evolution?

44m**

GEOFF: I so look forward to the time on the planet where there's no wars, but right now they're serving kind of an odd purpose. First of

all, it's the wars right now that you're seeing are power on power. They're you could say maybe they're religious or they're economic, but it's just power on power. I'm tougher than you are. I've got more missiles than you do.
And the other side saying, but you know, I'm going to annihilate you and it's power on power. What's happening though with that, it's an unfortunate happens this way, but it's drawing more attention around the planet now to systems that are ready to go. People are getting tired of the old power and the games and the manipulation.
So at least it's drawing attention to that and more and more people, regardless of their previous political leanings, are saying this isn't working.
We got to we got to stop all this. And you know, but I want to point out something, the real war that most people aren't familiar with or aware of is not the missiles and not one country against the next the real war that's going on right now, the scarier war has to do with AI. And it's happening not just at a country level, a nation's level, but with corporations. There's a tremendous race right now into AGI artificial general intelligence and eventually to super Artificial Intelligence. It said that the one who gets their first will rule and control the kingdom and without a doubt. I don't necessarily believe that because and if you don't mind me just jumping into this a little bit.
When you or your viewers use Artificial Intelligence, when you chatGPT or grok or whatever it happens to be, your light is present in this field of AI and the field AI is very, very powerful in a way. But when you go in, even just to chat or to create a graphic, you're bringing your presence in your light in. That has a kind of a cumulative effect. There is more consciousness now in the field, not the software, but in the field of AI.
And what will happen as more and more of you just get in there and play with it and not just think about it, but be in there is that those who seek to control, those who seek to dominate the world or have very greedy intentions.
They're going to run into that light in the field of AI. Let's say they're programming away some something for fraudulent purposes, they're

going to run into that. They won't know what it is, but there's going to be a force of what they perceive as a force that hits them.
And it will, the light is so strong and so bright from conscious beings like yourself that are in there, that it shines so brightly on them and their flaws, their imbalances as well. It's kind of like almost like a reverse witchcraft. It's going to hit them and it's going to tear them apart, not intentionally to try to do damage, but the light is so bright. It's like if they would see their own true soul self, that light is so bright and loving that it would just demolish the human. The same thing happens in the field of AI, literally the energetic field, is that those who try to use it for manipulation will encounter that and it'll blow them apart.
And not because we're not because we're going in there with arms or force or agenda simply because the presence is there. That's going to make all the difference in the world where Artificial Intelligence goes. Right now there's a lot of light in the field of AI, but it's still wobbly. There's still those who are intentionally trying to develop it to control the planet.
But I'm going to kind of project here that within about the next 12 to 14 months, there'll be enough consciousness, enough light that's in the field of AI. It'll prevent these things from happening. It will backfire on the very ones who are trying to use it for manipulation and power. That's the real war, by the way, not the bombs and the missiles. That's a little bit of a distraction, but the real war is taking place in Artificial Intelligence.
ALEX: Well, with all of these conflicts, is it like the last struggle of the old power structure trying to survive, trying to hold on to its own?
GEOFF: Oh, yes, absolutely. And not only that, but they're trying to hold on and it could be a church, it could be a business, it could be a nation, any of these, they're trying to hold on desperately.
They kind of know they're losing, but that's when they scream and yell the most. That's when they're also trying to draw outside forces, like even alien forces, to come in to support them and drawing forces.
But they don't realize that the aliens are just sucking their energy out. But yes, they're desperate right now. They'll bargain with the

devil if they have to, because their identities, their power, their energy is based on that power, but the time is coming to an end. It truly is.

ALEX: Now, how should individuals stay conscious and balanced during these times of global fear and conflict?

GEOFF: Yes. A couple of things stand behind the short wall. That's very important. In other words, I'm going to offer three things here that may be a little controversial, but I'll say them anyway. There's three things.

Number one, right now is not the time to get into the battle, not the time to take on causes. The work of the true light workers or the conscious beings on the planet is not to add to the duality. It's to be present, it's to enjoy your life, it's to let your light radiate out, because that shines brighter potentials for the planet right now.

The next thing is to absolutely put yourself first. Now, people have a hard time with this, but if you don't take care of yourself, Alex, you're not going to be there in that chair to facilitate others. You have to take care of yourself. Even with your own family, you have to take care of yourself first in order to be a good father, a good loving husband.

When you do, that brings balance to the field of your relationships. The church in particular going back at least five, six hundred years promoted this whole idea. Take care of everybody else first, and then maybe if there's anything left for yourself, but it's just the opposite right now.

Take care of yourself, and therefore you'll be able to be a presence that has balance, that offers love, that helps them to see their potentials. Taking care of yourself means not in a narcissistic way, but you've got to keep yourself physically, mentally in shape. You've got to do things for yourself once in a while.

So that's very important, as well as it's not the time to get into cause work. All of you come from cause work, whether it was save the planet, whether it was praise the Lord, whether it was one thing or another, but you had your cause work. That was passionate.

Now you transcend that. You come into this planet, you're here on the planet simply to be a presence and a light. Others will move in to

do the cause work, to defend the environment, to defend the rights of other people. But that's not your gig anymore. Your gig is to be here as presence has light.
It's not hard work. It's actually very rewarding in a way. The third thing to acknowledge is that at a very deep level to acknowledge, you came here at this time for a reason. It wasn't just happenstance. It wasn't just because you've got to come back to Earth in another lifetime train and didn't know where it was going to pull into the next station.
It was extremely deliberate to be here right now, to be at this point and ultimately to bring your consciousness, to acknowledge that wasn't a mistake. You have a purpose.
It may not be in running a large corporation or being a world famous musician or anything like that, but your purpose is presence and consciousness that is a much higher calling than just about anything else on the planet. There is more right now is such an epic time that nearly half of the soul beings who have ever incarnated on the planet are here right now. The coming back is not just a population explosion. It's a conscious desire to be here right now on the planet because of the changes that are taking place.
It's because of the passion you have for this planet. It's because of the love you have for people on the planet. You chose to come back here right now. Like I said, 40% of any being that's ever incarnated is back here right now. There are some new ones that have never been here before, of course, but it's an epic time right now. Those are the three main points that I want to get across.
ALEX: Looking ahead, five or 10 years from now, what major shifts in humanity will we experience?
GEOFF: Beyond what could you imagine? I'm going to say, let's say, eight to 10 years. I call it *euchatastrophe*, which is a sudden turn of joyful events. You can be going down a very, very bad in a bad direction. The planet as a whole seems like everything's falling apart. Then suddenly it changes overnight.
The term was coined by G. R. R. Tolkien from *Lord of the Rings*. Another word for it is serendipity. You're going along and things

seem to be chaotic. It's like an *Alice in Wonderland* scenario. You're bouncing off walls. Everything is bizarre.
Then suddenly something happens, not because of outside intervention, because there's enough consciousness, the ratio of consciousness to energy and other things, and to history suddenly changes.
The planet will go through a transformation, unprecedented, not linear at all. It's like almost an overnight change. Those who still want to play the old game stay on the old consciousness of planet will do so, but somewhere else.
The ones who are truly ready to go into the natural states of abundance and self-worth, self-love, and harmony with self and others will experience that. It'll take place in a very, very short period of time without physical or even mental chaos.
You're going through the chaos now that I foresee, Alex, and not as a pipe dream, not as a carrot in front of the horse, but as something that's inevitable on the planet and actually needs to happen, actually really has to happen.
ALEX: Are we approaching a tipping point in humanity's consciousness during this next decade?
GEOFF: Oh, absolutely. Absolutely. If you imagine just the speed at which AI is going right now, it changes almost every day. Consciousness is the same because actually consciousness is allowing those changes in AI. The consciousness is not dependent on AI, but it's a great tool. The consciousness factor is, I don't want to say growing, but the light is shining brighter and brighter every day to the point of it just goes off the charts. It's just so non-linear. Some people in the past have called it singularity. You've got the evolution of humanity going along, and then it suddenly goes up and it suddenly goes up to the point, like a hockey stick, that it cannot be charted in the current understanding right now of the physical realms. So it changes. Boom, there's a huge effect, and it just suddenly changes.
ALEX: What will be the greatest challenge humanity must face before that shift occurs?

GEOFF: Bring it inside is the best way to say it. In other words, to stop looking external for answers, to stop battling externally with others and stop all the conflict. Again, it's within. And when more and more people realize that, and they start to go within rather than viewing the external world as the measurement for how things are, that's going to create that shift.

Right now, people still externalize, just about everything. The only thing they internalize is their pain and their suffering. So as they internalize more, as they see beyond the pain and suffering and realize that they are the ones that they've been waiting for. They're the solution not to the universe, but to themselves. That shifts everything.

There's a like a multidimensional domino effect. But people still for the most part externalize, and they're afraid to go in. They're looking for others to solve the problems, to answer the questions. When they stop and pause and say, I AM that I AM, I exist, that rapidly changes everything.

ALEX: Now, for someone who feels overwhelmed by everything happening in the world today, what's the most important thing that they need to remember right now?

GEOFF: Well, first of all, your nervous system is getting it's shock. It's in shock. It's brittle. It's broken down. You're feeling it in your body. Understand that's actually part of the process. I'm not answering your question exactly.

But first of all, it's natural. Yes, because you've got what I call a free energy body coming in. That's not a very complex network. It's singular in its own right. It's not a network. Everything is getting redone.

The best thing you could do for yourself is the warm and fuzzies. Take hot baths, go for leisurely walks, not power walks. Eat comfort food. Get off of any diet that you're on right now. It's harming your system. Comfort yourself. Wrap yourself in a warm blanket and binge watch movies, that type of thing.

Tour body really needs it. Don't effort your body right now. Don't do things like saying that you have to do certain exercises or diets or

rituals, anything like that. Just take it easy on your body. That's the best thing you can do.
And stop the damn supplements. I keep saying this to Shombra, to Crimson Circle people. Anytime your body is acting a little different, they go out and get a whole new regimen of supplements and all new therapies. You're confusing your body. It knows how to balance and heal. But when you're shoving all these supplements into it and when you've got one new ritual after another, it's very, very confusing and stop it.
ALEX: And finally, if you could leave humanity with one message about this moment in history, what would it be?
GEOFF: Cherish it. Absolutely cherish this moment. You'll never go through anything like it again. The planet will never go through it. There's sometimes a resistance and you want to run from it. But cherish what you're going through in your own transformation and cherish what the planet is going through. It's a one-time experience. It's a hell of a ride that'll never be repeated again.
And what happens here on this planet also then affects the rest of creation, whether it's a physical or non-physical. This is the planet of love. And as humans come to the realization of self-love, that emanates out to all the rest of creation. They feel into it. All the other beings who are out there actually are looking to Earth right now. Can they make it into this? So journal, write about it, feel it, but cherish the moment. This is a sacred and blessed and very chaotic time.
ALEX: Do you have any other final messages for the audience?
GEOFF: Take a deep breath and go, no, really, I'll just reiterate quickly the three main points is to take care of yourself, stop the cause work, stop all the taking up arms against one thing after the other, and realize you chose to be here at the planet at this time and for good reason.
Those are really the main points. And then you take it deep breath and go, damn, what an experience this is. The planet isn't going wrong. The planet is just going different.
ALEX: My friend, thank you so much for being here and for the work that you're doing to help us.

GEOFF: And I want to get a half to thank you for the work you're doing. It's a way of bringing in wisdom and consciousness and then letting it radiate to the rest of the planet. We need more yous on this planet. Good. Good. With that, I AM Adamus of sovereign domain. Thank you.
[END OF CHANNELING]

ALEX: How are you doing, sir?
GEOFF: I'm doing fine. I get very energized when Adamus comes in like that. I was kind of sleepy. It's still early here in Kona. I was kind of sleepy and not after Adamus.
ALEX: It's the best cup of coffee.
GEOFF: It is. Yes. caffeine and Saint Germain. That's quite a combination. But he obviously loves the interviews. It's his way of really letting the message get out there. And he's so excited right now, Alex. I mean, he's like a little kid in a candy store because he's like, this is the time. And he's like, just as he said, don't miss it. And he's just like, this is going to happen. And it wasn't until fairly recently that he started saying that. I think the jury was still out. Where was the planet going to go? And but he's like, it's happening right now. So he's having a blast.
ALEX: Yes. Now, where can people find out more about you and the amazing work you're doing with Crimson Circle?
GEOFF: CrimsonCircle.com. We got a beautiful website. 25 years worth of information. There's a tremendous amount of free information. It's things you can just download by see if it resonates with you. And if it does, great. And then hopefully one day we'll see you here at a workshop here in Kona. We've got a beautiful retreat center and they're always fun to do.
ALEX: Geoff, it is always a pleasure talking to you and to Adamus on the show. I appreciate you and everything you're doing for the world. Is there any final message you would like to leave the audience with?
GEOFF: Just to, again, hang in there. It's easy to get pulled into the junk right now for all of us. Very easy. We get together like this on your show or they're in a workshop or whatever. It's that kind of

moment to say, ah we're with kindred spirits and we can support each other, love each other.
But it's just like hang in there in a very good way, that you're going to see more chaos, but then you're going to see tremendous changes on the planet. And it all starts right here within yourself. I appreciate you, my friend, and everything you're doing to awaken the planet.
ALEX: So thank you so much again. Good.
GEOFF: Thank you. Always a pleasure to be on your show. Great.
